FULL - STACK DEVELOPER

EXPERIENCE

• La Nouvelle République

Tours 2023 — 2025

Python

React.js

Next.js

Perl

Node Red

vim

Software developer on various projects tied to article writing and management.

- Built a Python web-article archiving servlet communicating with a Digital Asset Manager
- Developed a mobile and web push-notification management interface for article publishing
- Improved video article handling
- Created an XML export pipeline for automatic events-booklet generation

• PetalMD

Remote → Québec 2022

Ruby on Rails

Express.js

ElasticSearch

Docker

Git

Back-end Ruby on Rails consultant for a medical appointments platform

- Built internal Express.js tooling: medical appointment synchronisation and reconciliation
- Set up delta checks between the local information system and healthcare providers
- Throttled appointment-update workers: resource-usage analysis, payload sampling, CRON optimisation

• Prototyper

Tours 2020 — 2021

Vue.js

TypeScript

React Native

AWS

Full-stack developer on several AWS-hosted applications

- Built a React Native app for medical records management with structured procedure pipelines
- Developed a Vue.js/TypeScript web app integrating Salesforce records, CKEditor, and internal messaging
- Created a Vue.js IoT data-visualisation app with a real-time preview interface on AWS

• Syadem • MesVaccins.net

Bordeaux 2015 — 2019

Ruby on Rails

CoffeeScript

PHP

Ansible

Web developer, mobile and desktop versions

- Designed and implemented a mobile-friendly responsive version of the site
- Simplified vaccination and diagnosis entry flows
- Integrated the app with third-party medical record platforms
